

The World's Most Deprived

Characteristics and
Causes of Extreme
Poverty and Hunger

Akhter U. Ahmed, Ruth Vargas Hill,
Lisa C. Smith, Doris M. Wiesmann, and
Tim Frankenberger

With Assistance From
Kajal Gulati, Wahid Quabili, and Yisehac Yohannes

Embargoed for media release until November 6, 2007, 17:00 GMT

The **International Food Policy Research Institute** (IFPRI) was established in 1975. IFPRI is one of 15 agricultural research centers that receives its funding from governments, private foundations, and international and regional organizations, most of which are members of the Consultative Group on International Agricultural Research.

“A 2020 Vision for Food, Agriculture, and the Environment” is an initiative of the International Food Policy Research Institute (IFPRI) to develop a shared vision and a consensus for action on how to meet future world food needs while reducing poverty and protecting the environment. Through the 2020 Vision Initiative, IFPRI is bringing together divergent schools of thought on these issues, generating research, and identifying recommendations.

This report was prepared for a policy consultation process coordinated by IFPRI and focused on the World's Poor and Hungry People. IFPRI gratefully acknowledges the contributions of: Asian Development Bank (ADB) www.adb.org, Bill and Melinda Gates Foundation www.gatesfoundation.org, Canadian International Development Agency (CIDA) www.acdi-cida.gc.ca, Deutsche Welthungerhilfe (German Agro Action) www.welthungerhilfe.de, European Commission ec.europa.eu, German Federal Ministry for Economic Cooperation and Development www.bmz.de, with Deutsche Gesellschaft für Technische Zusammenarbeit www.gtz.de (BMZ/GTZ), International Development Research Centre (IDRC) Canada www.idrc.ca, and Irish Aid www.irishaid.gov.ie.

ACKNOWLEDGMENTS

This study was undertaken for a policy consultation process focusing on the world's poor and hungry people, coordinated by the International Food Policy Research Institute (IFPRI). It was made available at the international conference on "Taking Action for the World's Poor and Hungry People," organized by IFPRI with the Government of China (State Council Leading Group Office on Poverty Alleviation and Development) on October 17–19, 2007, in Beijing, China. IFPRI gratefully acknowledges the financial contributions of: the Asian Development Bank (ADB), the Bill and Melinda Gates Foundation, the Canadian International Development Agency (CIDA), Deutsche Welthungerhilfe (German Agro Action), the European Commission, the German Federal Ministry for Economic Co-operation and Development with Deutsche Gesellschaft für Technische Zusammenarbeit (BMZ/GTZ), the International Development Research Centre (IDRC) Canada, and Irish Aid. Financial support for the work on the Global Hunger Index, provided by the German Federal Ministry of Economic Cooperation and Development, is gratefully acknowledged.

The analysis of household survey data from most case-study countries was undertaken under the auspices of the project "Improving the Empirical Basis for Assessing the Food Insecurity in Developing Countries" (the AFINS project), which has been funded by a consortium of donors, including the Australian Agency for International Development, the Canadian International Development Agency, the Department for International Development—UK, the United States Agency for International Development, the United States Department of Agriculture, and the World Bank. We also acknowledge the national statistical services in the case-study countries for administering and compiling the datasets employed.

We gratefully acknowledge all the help and advice received while preparing this report. In particular we thank Rajul Pandya-Lorch and Joachim von Braun for conceiving this project and for providing stimulating comments and suggestions as we carried out the study. We benefited greatly from valuable and insightful comments from two reviewers: Christopher Barrett and Tewodaj Mogues. Thanks also go to Marie Ruel, John Hoddinott, Klaus von Grebmer, Marc Cohen, Stanley Wood, and other colleagues at IFPRI for their input to this study. We are grateful to Gwendolyn Stansbury for her careful editorial assistance.

2020 VISION ADVISORY COUNCIL

Mr. Tom Arnold

Chief Executive Officer
Concern Worldwide
Ireland

Mr. Sartaj Aziz

Vice-Chancellor
Beaconhouse National University
and Former Finance Minister, Foreign
Minister and Agriculture Minister
Government of Pakistan
Pakistan

Mr. Lennart Båge

President
